

Did you know?

Road Safety is no accident!

Travelling and floating your horse can be a safe and stress free experience if you give yourself enough time and you put enough thought into the preparation for the trip.

Always make sure your vehicle and your float are in good working order!

Always be aware that you have a large, top heavy, shifting weight back there!

Always remember that other drivers may not make any allowance for your precious cargo!

Please visit the Queensland Horse Council website at www.qldhorsecouncil.com, browse to the safety page and feel free to download the information that is available in the fact sheets available on every page.

Fact Sheet – Towing Driver Responsibilities:
